Superior technology  
and raw materials  
reflect extra-bright  
surfaces charged with  
depth. The glazes  
give the walls an  
intoxicating glow and  
transform the space,  
which becomes vibrant  
and irresistible.

The small Fusion sizes tell the story of artisan ceramics combined with technological innovation. The sophisticated imperfections, colour shades and every detail express the value of tradition with a contemporary twist.

Fusion gives every household surface a tactile appeal. The small, glossy, irregular modules are ideal for wall coverings and also lend harmony and style to flooring.\*

As with any artisan material, contact with outdoor areas should be avoided when laying it on the floor.

Every single 6x25 module expresses something unique and original. Small surfaces embody authenticity and, like handcrafted surfaces, above all convey variability and exclusivity.

Fusion is a collection that perfectly complements all looks. Whether it features wood, marble or stone effects, beauty is always guaranteed.

Fusion differs from other ceramics starting from its details, including the most hidden. The reproduction of imperfections and irregularities extends to the edges and embellishes the ceramic material with great naturalness and artisan appeal.

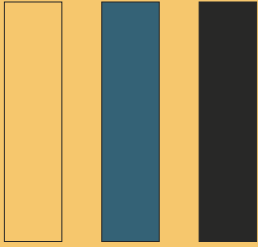

The brick size is a valuable asset for compositional creativity. The small module is ideal for colour combinations which, combined with original compositions, can design truly unique and personalized walls.

Exquisite Fusion, with its deep, unrivalled radiance, decorates the most chic and sophisticated contract spaces. The tactile effects and vivid colours express a striking contemporary style and natural luxury.
