

DUSK

Materic Blend

Materic Blend

The essence of minerals
in a compact, stylish surface.

Two materials, one vision

Dusk brings together two iconic materials: Montpelier Limestone and Portland Stone. A compact, tasteful, tactile combination that gives these materials a contemporary reinterpretation, transforming them into a visually immaculate surface with an architectural language of powerful simplicity.

Portland

Montpellier

The Dusk colour collection comprises six shades that translate light and matter into vibrant chromatic experiences with a clear identity. From luminous Moon to deep Coal, each hue creates a unique mood with a distinctive restrained intensity. A tasteful selection that gives coherent expression to modern design.

Inphase technology:

light and graphics in synchrony.

Inphase is the ground-breaking digital technology that creates structured effects without physical relief textures. Changing the way the material refracts the light, Inphase synchronises with the graphic design, alternating matt and gleaming finishes. The resulting surface has great visual depth and dynamism, evoking three-dimensionality while still smooth to the touch.

Pure extra-matt finish

Dusk's breathtaking realism is enhanced by the seductive extra-matt finish, achieved by intensive research into glazes, raw materials and production processes. The surface, with a naturally velvety, silky 'feel', has outstanding slip resistance, combining an exquisite look with excellent technical properties.

3D Carved, form shaped by design

The Carved decoration has a sculpted surface with a simple yet profound graphic rhythm. Three-dimensionality and light combine in an intense, contemporary architectural surface. Its powerful yet measured motif adds character to spaces with an elegant interplay of shadows, reliefs and geometrical forms.

OVERSIZE is dedicated to large slabs, a peerless pairing of state-of-the-art technology and sophisticated aesthetics. Continuous, versatile surfaces for floors, walls, kitchen and bathroom furnishings and even the most innovative architectural applications such as building facades.

OVERSIZE
120×278×0,6
6 mm

Stonecut, controlled-relief 3D surface

Stonecut embodies the spirit of carved matter with the precision of the finest stone-masonry. Its three-dimensional texture is generated by a controlled design that interprets stone as an architectural surface: carefully calibrated yet dynamic relief textures dialogue with the light and amplify the slab's tactile personality.

The Draw surface itself becomes a tactile, vibrant design motif. The irregular, seemingly engraved marks amplify its three-dimensionality and generate luminous depth and an authentic identity, ideal for projects of great expressive power.

Inphase technology

In the darker shades, Inphase intensifies the porcelain stoneware's visual depth through the dialogue between matt and reflective areas. The light amplifies the colour's intensity and emphasises the details of its patterning. Its surface is perceived as three-dimensional although actually perfectly flat.
